Sustainable Projects... Making Energy Easy

Wishing you a Merry Christmas and a Happy New Year!

We would like to take the opportunity to say thank you for your support during 2010 and we look forward to working with you in 2011

**Welcome to our new quarterly Newsletter!** We plan to keep you up-to-date with existing services along with any new services we offer.

Our first exciting piece of news is that after months of development and testing we are now getting ready to launch our new Energy Services Online Database. Along with a new look, we've added many new features, including the ability to order keys and cards online, report missing or damaged meters and an area where we can keep you informed on the properties progress through the scheme.

We will be providing training on the new database through the months of February and March with a view to launching the new database once training is completed. We will be contacting you in the new year to arrange training, Training will be provided a few ways, in groups at your office or our office, or individually over the phone. Watch this space...

## Air Conditioning Inspections

Did you know that all existing air conditioning systems over 12kwh must have an Air conditioning inspection completed by 4<sup>th</sup> January 2011? This is a requirement of the Energy Performance of Buildings Directive (EPBD) and time is quickly running away to get these completed. PCL working in partnership with EZZI Energy Solutions is now able to offer a low cost and professional Air conditioning inspection service. Please call us on 01733 866446 to discuss your requirements in more detail.

## Thermal Imaging

PCL now offers a thermal imaging survey service to our partners. We're currently working on several projects from hard to treat homes as well as helping to provide data for home improvement works. If you need any thermal imaging work completed please feel free to give us a call to discuss your requirements and we will see how we can best assist you.

## Our Opening Hours

Monday to Friday from 9.00am till 5.00pm  
(except Wednesday when we are closed from 9-10 for staff training)

## Christmas Hours

We will be closed for Christmas from midday Christmas Eve till the 4th January

## Display Energy Certificates

Since 1 October 2008 public buildings in the UK over 1,000m<sup>2</sup> must display a **Display Energy Certificate** (DEC) prominently at all times. Display Energy Certificates were introduced by the British Government in response to the EU Energy Performance of Buildings Directive which all EU member states must implement by January 2009.

PCL now offers a Commercial Energy Service in partnership with EZZI Energy Solutions, if your DEC is nearing expiry please give PCL a call on 01733 866446 to discuss your requirements in more details and to receive a competitive quote.

## Electric Prepayment Keys – Good News!

We've secured a 'Pay Point' machine which will be fitted within our offices no later than the end of March 2011, allowing us to prepare and send new electric meter keys out in the post within 24hrs of receipt of your key request – so 'post pending' requested electric meter keys should be with you within 48hrs of key request. We will be able to load a key to clear debt up to £100 (A read) where the weekly standing charge is less than £3.50 (F read). The other benefit is that it will be quicker for us to gain appointments for meter wipe downs. This is a big win for us all and we will confirm the exact date for the start of the new process when we have it.

Let us know what you think, Is there anything we can improve on or if there's anything good we're doing then we'd love to know!
